PROJECTS

SEO

1

WHAT

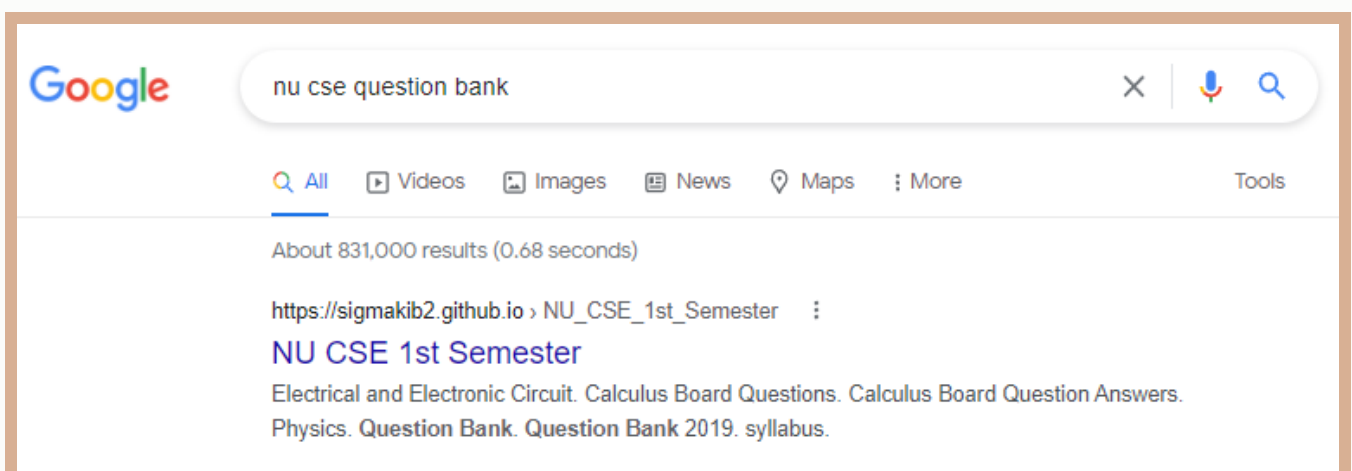

This project was about a website supplying notes for students studying computer science and engineering in Bangladesh.

HOW

- Proper keyword research
- Understanding different search query
- Proper site structure

RESULT

I am getting the majority of students who are searching for study material. It's a niched based website made using GitHub pages.

PROJECTS

SEO

2

WHAT

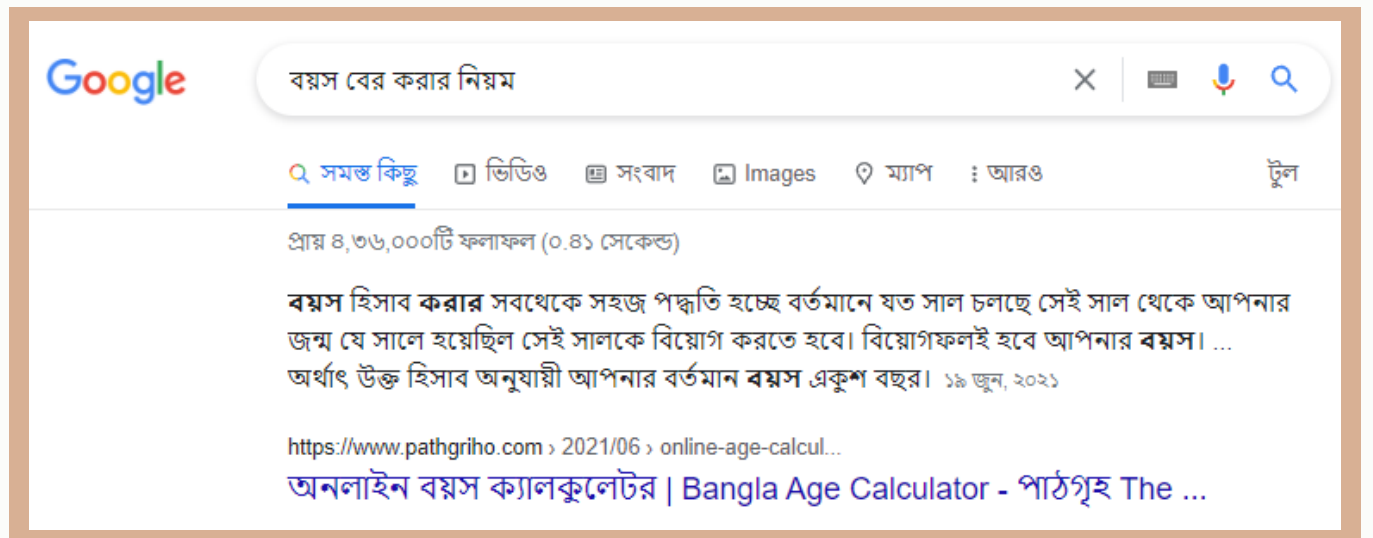

This project is about a Bangla blog website. This website is reputed educational blog website in Bangla language.

HOW

- Proper keyword research
- Understanding different search query
- Proper site structure
- lots of quality content

RESULT

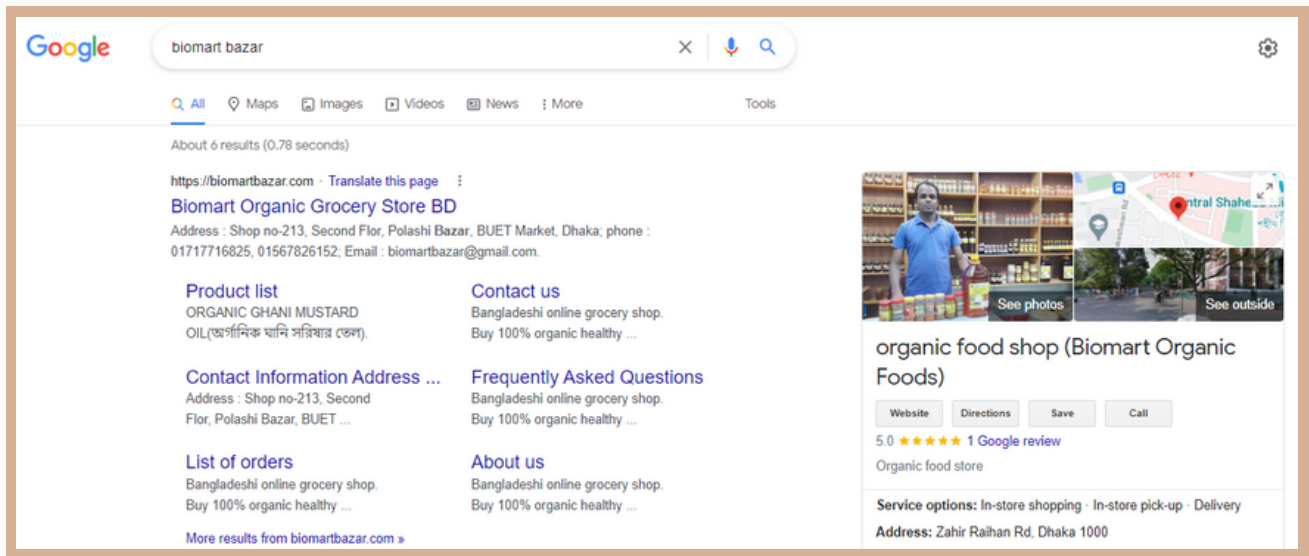

We get millions of impressions every month and 50K + Google search clicks. This number is constantly increasing.

PROJECTS

Local SEO

3

WHAT

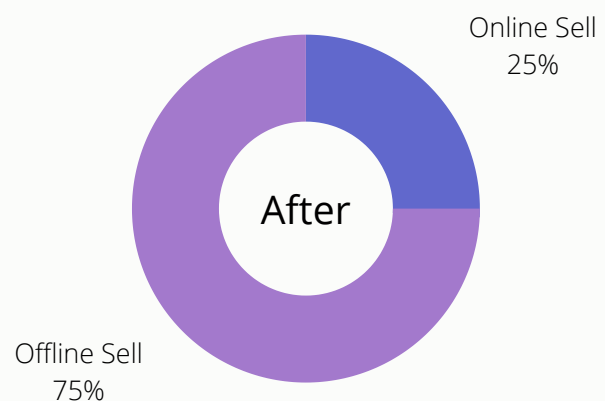

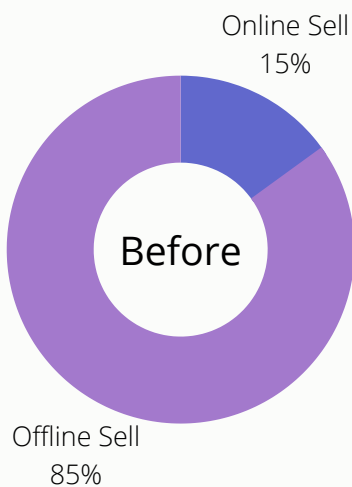

This project was about a local business. They are selling organic food. My job was to list their business on google my business and do on-page, off-page SEO for the website.

HOW

- Proper keyword research
- Understanding different search query
- Proper site structure
- Proper product schema
- Brand building

RESULT

After a month, I analyzed their selling report and found that they sell more products online than before. Even nearby people are getting suggestions of that shop.
